An enthusiastic Designer/Developer who strives to create applications. My objective as a Java Developer is to apply my technical skills in IT craftsmanship and IT implementation, and utilize my knowledge in web configuration and troubleshooting to fulfill the company's vision and mission. I aim to bring success to the company by designing specific IT solutions that will address technical issues usually encountered in a Java environment. My solid expertise in the data source provision, software modification, plus my first rate knowledge in Java applications are very beneficial in meeting the company's technical requirements. I am a team player, open to adapt changes and a great problem solver. With this said, I can assure that I can be a useful talent of the company.

I am always ready to learn technologies to enhance my knowledge. Tech-savvy, versatile and self-directed-professional with 18 years of experience in the field of Development-Education. Highly adept in providing professional development integrating technology into existing curriculum and creating new lesson plans to encompass technology in all classrooms. Excellent organizational and team building skills distinguished by commended performance and proven results. Strong interpersonal skills in establishing positive relationships with students, parents, colleagues and administrators.

- Flexible, pro-active, can-do attitude with commitment towards work.
- Excellent written and oral communication skills along with the ability to multi-task.
- Outstanding management & organizational skills with ability to work in deadline-driven, complex and demanding situation.
- Passion for teaching by engaging students in the subject matter.
